Deloitte Luxembourg
CTO Office, Hiring Manager

Dear Hiring Manager,

I am writing to express my interest in the **CTO Office Technical Advisor** position at Deloitte Luxembourg. With 15+ years of hands-on experience architecting enterprise-scale cloud, platform, and secure software solutions across IBM, Accenture, Capgemini, and Deloitte, I bring the advisory depth to translate technical credibility into actionable guidance for CTO-level stakeholders.

The mandate you describe: accelerating technical maturity, monitoring emerging technologies, unblocking cross-functional teams, and shaping the technology roadmap, is precisely what I have delivered throughout my career at IBM, Accenture, and Deloitte for clients across Financial Services, Insurance, Telecom, and Energy & Utilities. The difference here is scope: advising internally, from within the CTO Office, rather than externally as a consultant. That shift is one I find compelling.

Three aspects of my track record are directly relevant to this role:

- ☑ **Cloud and container architecture at scale:** I have designed and advised on Kubernetes-native, multi-cloud platforms across AWS, GCP, Azure, and IBM Cloud, including sovereign hybrid patterns for regulated environments and GDPR-compliant architectures.
- ☑ **Secure software engineering and DevOps:** from embedding DevSecOps practices and zero-trust security into CI/CD pipelines, to clearing 140+ regulatory controls with zero findings on a major insurtech programme, I bring the applied cybersecurity and software quality mindset the CTO Office needs.
- ☑ **Cross-team unblocking:** whether reducing environment provisioning from 18 days to 4 hours for 500+ engineers at a major telco, or designing the missing AI platform layers that transformed a global conglomerate's raw GPU infrastructure into a self-service marketplace, my engagements consistently centre on diagnosing architectural bottlenecks and providing actionable solutions that restore engineering velocity.

I am fluent in English and French, hold Lean Six Sigma Black Belt and Scrum certifications (PSM, PSPO, Kanban), and am a TOGAF and SAFe practitioner. Throughout my career, I have spent significant time communicating complex architectural recommendations to both technical teams and non-technical senior leadership, a balance the JD rightly emphasises.

I would welcome the opportunity to discuss how my experience can support the CTO Office's mission. I am available at your convenience for a conversation.

Yours sincerely,

Laurent Vincentelli

Senior Technology Advisor, Cloud, Platform & Secure Software Engineering
